

TACTIVO™

Mobile Smartcard Reader for iPad

Tactivo is a form-fitted mobile smart card reader that provides convenient and secure access to restricted resources on mobile devices.

Convenient Mobility

Tactivo brings true mobility to organizations using smart cards and solutions can be deployed in the existing PKI (Public Key Infrastructure). Our smart card readers are proven and used by the US government, UK and Swedish healthcare and Fortune 500 companies.

Wide range of use cases

Tactivo can be used with a wide range of applications that enables many different use cases within healthcare, government and enterprise. Our strong partner network, which includes some of the leading mobility vendors, offers solutions that easily can be integrated into any smart card infrastructure.

Secure and compliant

Tactivo for iPad offers strong security through two-factor authentication, combining smart card authentication with PIN-code. All our smart card readers are FIPS 201 compliant, listed on GSA APL. Tactivo supports U.S. smart card credentials including PIV, PIV-I, CAC, and TWIC.

iOS Toolkit

The iOS Toolkit allows developers to implement self-contained authentication or integrate with third-party identity managers and service providers, which enables Tactivo to be used with any app.

User experience

Tactivo for iPad is form-fitted and designed to perfectly fit and protect the device in order to ensure a user friendly experience. The smart card is easily inserted and removed on the back of the smart card reader.
